

## Personal Information

**Name:** Niverton Ricardo Bezerra Neves

**Date of Birth:** 2000 (24 years old)

**Nationality:** Brazilian

**Location:** Brazil (Open to relocation)

**Phone:** +55 81 9 96095850

**Email:** niverton.neves@gmail.com

**LinkedIn:** [linkedin.com/in/ricardo-bezerra-22bb661a4](https://www.linkedin.com/in/ricardo-bezerra-22bb661a4)

**GitHub:** [github.com/ricardobezerra22](https://github.com/ricardobezerra22)

**Portfolio:** GitHub-based portfolio

---

## Professional Summary

Full-Stack Developer with over 5 years of experience and with expertise in Vue.js, React, and Node.js, focusing on building scalable SaaS applications, micro front-ends with SPA, microservices to better scalable backend systems, SEO optimization with metadata and Google analytics integration. Experienced in designing RESTful APIs, implementing authentication systems, Generative ai integrated to SPA's, and optimizing system performance. Strong DevOps background with knowledge in CI/CD, Docker, and cloud infrastructure (AWS/GCP). User of clean architecture, security best practices, adept to fast-paced environment, team player and software engineering principles. Open to international opportunities and relocation.

---

## Work Experience

### Safetec (Jan 2024 – Present)

**Full-Stack Developer -> [Safetec | Especialista em serviços de nuvem e transformação digital](#)**

- Developed scalable SaaS applications using Vue.js, Node.js, and TypeScript.
- Designed RESTful APIs and implemented OAuth2 authentication
- Did Open AI integrations with google workspace for a better productivity system for users.
- Optimized backend performance, reducing database query response times by 40%.
- Built CI/CD pipelines for automated deployment and testing.
- Ensured security best practices following OWASP guidelines.

- Refactored old codebases, updating systems and applying better performance, and being careful for don't break anything.

## COMEIA (MAR 2022 – Present)

### Full-Stack Developer

- Created **SaaS One**, an enterprise platform reducing SaaS expenses by over \$20,000 per month. -> [Saas One](#)
- Worked on **TeamCulture**, an HR management SaaS, improving frontend performance and accessibility. -> [teamculture.com.br](https://teamculture.com.br)
- Implemented Jest and Cypress for end-to-end testing.
- Integrated microservices architecture to enhance scalability.
- Documented whole frontend components with Storybook
- Used Single page application and microservices
- Clean code architecture & TDD to backend and frontend
- Time management with high valuable books (12 weeks year, The 4 hours work week, effortless, essentialism, deep work, Build Don't Talk)
- Agile methodologies with ClickUP and JIRA
- Led development of scalable single-page applications using React and TypeScript
- Optimized web performance metrics and Core Web Vitals for enterprise SaaS platforms
- Built reusable components and implemented comprehensive testing strategies
- Collaborated with cross-functional teams to enhance user experience
- Architected frontend solutions leveraging modern state management libraries
- Developed SEO-driven features to support organic traffic growth
- Maintained high-quality documentation and technical specifications
- Implemented data visualization and complex tabular data presentation

## Numerarte (DEC 2019 – Mar 2022)

### Full-Stack Developer

- Developed and maintained ERP systems using Vue.js and Node.js.
  - Improved application performance through optimized caching and database indexing.
- 

## Education

### Bachelor's Degree in Analysis and Systems Development (2023 – 2026)

**University:** UNICESUMAR

**Law (2018–2022) – Incomplete**

**Institution:** ASCES-UNITA

---

## Technical Skills

- **Frontend:** Vue.js, React, Next.js, Nuxt.js, TypeScript, JavaScript, CSS, Tailwind CSS, SCSS, Vuetify, PrimeVue, Shadcn, Material UI, Vue Router, Vuex, Pinia, Redux, Google Analytics, SEO, StoryBook.
  - **Backend:** Node.js, Express.js, NestJS, GoLang, Python, Fastify, Django, AWS DynamoDB
  - **Databases:** PostgreSQL, MongoDB, Firebase, noSQL, Supabase, Firestore
  - **DevOps & Cloud:** Docker, Kubernetes, AWS S3, Google Cloud, CI/CD, GitHub Actions, Firebase
  - **Security & Testing:** Jest, Cypress, OWASP Security, OAuth2, Firebase Authentication, Cucumber
  - **Version Control & Workflow:** Git, GitHub, GitLab, Agile (Scrum/Kanban)
- 

## Projects & Achievements

- **NutriFlow** – AI-powered nutrition planning system using OpenAI and Node.js.
  - **SaaS One** – Google Workspace-integrated SaaS management tool.
  - **TeamCulture** – HR SaaS platform with enhanced performance and UX.
  - **Phoenix** - Travel and logistics SaaS
  - **Freelancing** - Landing pages in general for markets
  - **BitcoinLiveTracker** - Web3 application to track bitcoin price using COINGECKO API
  - **Safetec** - Maintenance of whole Google workspace ecosystem of Google partner safetec, with +4000 customers with scalable applications , and old system maintenance
- 

## Languages

- **Portuguese:** Native
- **English:** Fluent (C1)
- **French:** Intermediate (B1)

---

## Certifications & Training

- **Comeia Academy Fullstack development (6 months Bootcamp) (2022)**
- **EF SET English C2 (Proficient Test)**

---

## Interests

- AI & Machine Learning
- Software Architecture
- DevOps & Cloud Infrastructure
- Productivity & Neuroscience
- Open Source Contributions
- Vue.js & React Development
- JavaScript/TypeScript Expert
- Frontend Architecture
- API Integration & Testing
- Performance Optimization
- Clean Code & Documentation
- Generative AI
- AI integration
